Re: DNP-Capstone Assignment

Dear Dr. Tullmann,

My name is Amanda Baltierra and I have been the “clinical expert” supervising Stacey Lambour at a residential treatment center during the past semester. The residential treatment center provides services to emotionally challenged children and adolescents in and around Northern Virginia. It has been my pleasure to work alongside of Stacey during this past semester and I look forward to providing her with clinical expertise and counsel in support of her completing the University of Virginia’s DNP curriculum and Capstone Assignment.

Stacey’s clinical leadership and interpersonal skills are stellar. She brings professional experience and enthusiasm to a very challenging workplace each and every day. Furthermore, she consistently exhibits grace under pressure, and a high level of maturity under tense and at times extreme circumstances. It is my opinion that Stacey will continue to improve her skills and serve the community with the utmost respect and professional expertise.

This past semester Stacey has been focused on identifying and researching an appropriate topic for her Capstone assignment. During this time I have provided her with guidance regarding clinical scholarship and organizational leadership. As a result of the effort, we believe the scope of her Capstone Assignment has been refined and focused so that it can be completed at this facility. It is my opinion that the topic is both helpful and relevant to the clients we serve and will enhance the overall quality of care delivered by the Grafton organization.

If I can be of any further assistance please feel free to contact me at amanda.j.baltierra01@grafton.org or 540-931-5626

Kind Regards,

Amanda J. Baltierra DNP
